

WE BELIEVE IN INNOVATION THAT IS DESIGNED AND BUILT TO LAST.

At All Blinds, we believe in innovation that is designed and built to last. With exclusive features, and exceptional materials, every one of our window blinds is made to measure, coloured and engineered to fit perfectly into your lifestyle. From the latest Venetian looks to modern twists on the classic roller, elegant vertical fabrics to energy-saving pleated designs, we'll help you find window furnishings to suit any room. Our wide range of blinds come in a huge variety of colors, fabrics, materials and operating systems (both manual and automatic).

WHY CHOOSE US

- We love products that work perfectly and look beautiful.
- We create based on a deeply analysis of your project.
- We create design with really high quality standards.

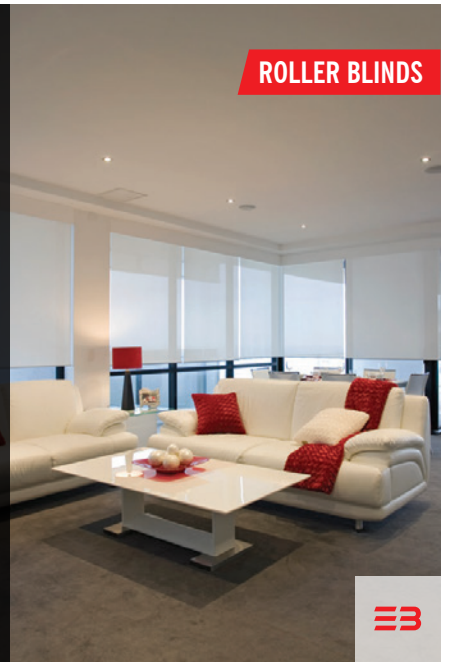

Vertical Blinds are an ideal window covering in any Commercial environment, public building both from a decorative and functional point of view. It can cover surfaces up to 6m wide and 4m tall in one span. In all situations it offers an unsurpassed ease of operation. By tilting the vanes, sunlight can be filtered efficiently, even without blocking the outside view.

VERTICAL BLINDS

There are three main reasons why roller blinds are becoming a popular window furnishings option. Firstly, they provide high degree of privacy. Secondly, they block the maximum light from outside. Thirdly, they are able to give you a lot protection from heat. There are two main types of roller blinds namely, Blackout roller blinds and sunscreen roller blinds.

ROLLER BLINDS

DOUBLE SHADE BLINDS

Double Shade Blinds are a new innovation in window blinds, where striped fabric across two layers creates the open and close effect. Operated by side chain, you are able to maneuver the shade to see through the stripes or alternatively to retract the blind entirely allowing for complete view of the window.

SOLARETTE BLINDS

Solarette Blinds feature soft adjustable fabric vanes with no cords or tapes, which appear to be floating between two sheer fabric panels that beautifully diffuse harsh sunlight into beautiful ambient light. Simply tilt the vanes to achieve your desired level of light and privacy. Available in semi opaque and opaque fabrics.

Wood blinds are both functional and a creative design element. Aside from being able to provide more privacy, wood blinds can also block incoming light. Our Wood Blinds are made with Original bass wood which is considered to be the best wood for blinds making. Bass wood do not bend or sag with harsh sunlight. Available in 35mm and 50mm variants.

WOODEN BLINDS

Warm up your interior with exciting range of woven woods collection. Made out of pure woodchips interwoven with threads and fibers. Our woven woods blinds are stitched neatly with border tape to secure the edges which also enhances beauty. Woven wood Blinds are available in Roll up and Roman style.

WOVEN WOOD BLINDS

Clean, crisp and modern, Panel tracks offer a sleek answer for both large and small window expanses. Open, they stack tightly to offer the maximum view; closed, they display their rich fabrics and texture, also giving enough flexibility to make your own color combinations by selecting one or more fabrics or panels.

PANEL TRACKS

Vertical Sheers combine a sheer fabric facing with soft, vertical rotating vanes affixed to the back of the sheer. They provide the ethereal beauty of sheer drapery panels along with variable light control and privacy, and are the perfect choice for wide expanses of glass, sliding doors, French doors and other vertical applications.

VERTICAL SHEERS

CELLULAR BLINDS

Cellular Blinds are the original cellular shades, specifically engineered to provide beauty and energy efficiency at the window in both cold and warm climates. Their honeycomb construction traps air in distinct pockets, which creates insulation. Cellular Blinds are available in Innovative operating system such as Classic, Top-Down/Bottom-Up and Day and night, which make these shades a top choice for any window.

ROMAN BLINDS

Roman Blinds bring a feeling of warmth sophistication and taste to any room. It's elegant yet softer approach to window coverings combines the stylish lines of curtains with the simplicity of a blind. Roman shades are usually opened with a chain mechanism, allowing the user to adjust the height of the covered area.

Open Roman Blinds are often known as the new age blinds. They are a fusion of the practicality of Roller Blinds with adding the look of Roman Blinds when pulled up. When the Blinds are drawn, they have horizontal stripes as their signature design created with their sheer fabric and have a unique feature of coming down like roller blinds.

OPEN ROMAN BLINDS

Interior designers and architects plan houses in such a way that maximum amount of natural light penetrates the interiors. However, excessive lights can be troublesome and hence there should be a proper light balance. Skylight blinds are helpful to counter such natural problems. Skylights are available in two variants they are Cellular Skylights and Roman Skylights.

SKYLIGHTS

Exterior Roller Blinds ensure maximum management of sunlight. Exterior shades intercept glare and solar heat gain before they enter a space, significantly improving overall performance. Exterior roller blinds come with hold down brackets to secure the shades as the bottom when lowered to keep them from swaying from the wind.

EXTERIOR ROLLER BLIND

Exterior PVC Blind are installed to the outside of your window or patio to block the sun light partially before they reach your interior, makes the room cool and greatly reducing air-conditioning costs. Exterior PVC Blinds provides daytime privacy while still allowing natural light and visibility on the inside.

EXTERIOR PVC BLINDS

All Weather Blinds are designed to withstand strong wind and rains. Produced with special 0.5mm UV resistant PVC sheet, stainless steel fittings and wires to protect against rusting. The intelligent use of transparent PVC fabric ensures the unblocked view. Specially recommended open areas like, balconies, food courts, roof top cafeterias, garden restaurants & similar open spaced settings.

ALL WEATHER BLINDS

Ziptrak Blinds were designed by a South Australian company which manufactured Roller Shutters and External sun shading system. They designed Ziptrak because the architects did not want gaps and wanted a product that was easy to operate. The Ziptrak blind is held into the channel by a small zip. This is called Zlock technology, the zip is high frequency welded to the fabric.
